Aberdeen Cadaveric Hand Trauma Course

18th & 19th May 2015

www.aberdeensurgicalcourses.co.uk

Our Hand Trauma course is highly interactive, hands-on, and is structured to meet the training needs of surgeons in Plastic and Orthopaedic Surgical training.

Participants will learn surgical techniques relating to hand trauma including tendon repair, flap reconstruction & bone fracture fixation. The course format includes practical skills sessions using fresh frozen cadavers, which are well preserved and closely simulate the clinical situation. With a faculty: participant ratio of 1:2, this course represents excellent value for money.

This course is aimed for CT1-ST4 in Plastic or Orthopaedic surgery.

Faculty

All members of faculty are prominent and experienced Hand and Plastic surgeons.

Programme

Day 1 – 18th May 2015

8.30 – 9.00 Registration and Coffee
